Over 100 years of Italian fashion and tanning tradition are combined to produce this unique combination of leather and modern surface effects in bicolorism, transparency and decorative elegance reflected in the its patent leather appearance. Our exclusive FIBERCUIR® finishing process preserves the naturalness of the leather yet transforms it into unique and distinctive fashion evolutions. Additional benefits are evident in its superior strength, technical specifications and suitability for high traffic environments.

REACH (EC 1907/2006) compliant production aims to improve the protection of human and environmental health. Processed using low emission mineral tanning formulas which are environmentally respectful, the hides are retanned in aged oak drums using vegetable agents, natural fat liquors, oils and dyes that ensure the leather is properly through dyed. Natural color variations may occur even within the same dye lot.
