

Prince

Only the finest European and New Zealand hides are selected for Prince. Bold full grain structure and hand applied two tone tipping create a rich texture and traditional leather elegance. This royal leather isn't just for the manor house; the protective finish makes it suitable for both public and private environments.

REACH (EC 1907/2006) compliant production aims to improve the protection of human and environmental health. Processed using low emission mineral tanning formulas which are environmentally respectful, the hides are retanned in aged oak drums using vegetable agents, natural fat liquors, oils and dyes that ensure the leather is properly through dyed. Natural color variations may occur even within the same dye lot.
