Stardust Metallic Dusted Hair on Hide

Stardust is the ultimate expression of glamour and refinement, fusing natural hair-on-hide with advanced finishing techniques. A state-of-the-art metallic dusting is applied through a specialized foil-transfer process, creating a luminous, sophisticated sheen that enhances the natural texture of the hide. The result is a striking yet elegant surface—bold, tactile, and unmistakably luxurious.

Natural beauty is found in the organic irregularities and variations from hide-to-hide ranging from hair length, color, cowlicks, fat wrinkles and other signifiers. These natural traits are inherent to this product and are not considered to be defects or flaws. No two hides will ever be the same.

This leather offers endless design opportunities for upholstery, rugs, wall coverings and other accents.

Applications: Workplace, Hospitality, Residential

Raw Material: Exotic

Hide Size: Average 40 – 45 sqft

Thickness: 1.8 – 2.0 mm

Flammability Resistance: Natural flame resistance. UFAC Class 1, CAL TB 117-2013, NFPA 260
