

Touché

Touché is a top grain, thicker cut leather featuring a silky smooth hand. The subtle tow-tone effect enhances the depth and dimension of the coloration and its rustic appearance. Natural characteristics such as healed scars, insect marks and other signatures of nature add character and beauty to this leather. Touché is suitable for both public and private environments.

REACH (EC 1907/2006) compliant production aims to improve the protection of human and environmental health. Processed using low emission mineral tanning formulas which are environmentally respectful, the hides are retanned in aged oak drums using vegetable agents, natural fat liquors, oils and dyes that ensure the leather is properly through dyed. Natural color variations may occur even within the same dye lot.
