

Venus

Venus is a top grain leather featuring the sophistication and elegance of old world tradition. The modern finishing techniques provide a rich transparent finish and smooth silky hand which enhance the natural beauty in this leather. Natural characteristics such as healed scars, insect marks and other signatures of nature add character and beauty to this leather. Venus is suitable for both public and private environments.

REACH (EC 1907/2006) compliant production aims to improve the protection of human and environmental health. Processed using low emission mineral tanning formulas which are environmentally respectful, the hides are retanned in aged oak drums using vegetable agents, natural fat liquors, oils and dyes that ensure the leather is properly through dyed. Natural color variations may occur even within the same dye lot.
